

REACH STATEMENT

The Regulation (EC) No 1907/2006 on Registration, Evaluation, Authorization and Restriction of Chemicals, also known as REACH, shall primarily ensure protection of human health and the environment. Therefore it stipulates various obligations for different types of economic operators.

Transonics PLC is a supplier of articles which are not intended to release any substances under normal or foreseeable conditions of use (under the definitions of REACH).

Transonics, as a distributor, does not certify compliance with REACH on behalf of the original manufacturers, since we for example do not control the manufacturing process of the products we supply. We advocate that our manufacturers make their environmental information available on their websites and work closely with our suppliers, in order to be able to provide you with their original declarations upon request.

Substances of Very High Concern (SVHC's) according to Article 33

Transonics is fully aware of the requirements stated in Article 33 of the REACH Regulation, and endeavours to provide its customers with relevant information available from our suppliers in a timely manner.

The current list of SVHC's ("Candidate List") is published by the European Chemicals Agency ("ECHA") and may be accessed on [here](#)

For more information about REACH, please visit the website of [ECHA](#)

For any further questions with regard to product REACH compliance, please contact your Account Manager.
